BREEZE ESP+ SUBSCRIPTION MODULES

Comparison Table

BREEZE ESP+ is available on a subscription basis, and we provide users with a variety of subscription options so that each user can select the option that works best for their needs. We offer four subscription modules that vary in capability and price (**BREEZE ESP+ TankESP LT**, **BREEZE ESP+ TankESP FX**, **BREEZE ESP+ TankESP PRO**, and **BREEZE ESP+ PRO**), as well as one powerful add-on tool (Sitewide Rolling Emission Report) that is compatible with three of the four modules.

Features	ESP+ TankESP LT	ESP+ TankESP FX	ESP+ TankESP PRO	ESP+ PRO
Platform	Cloud-based	Cloud-based	Cloud-based	Cloud-based
Tabular data entry[1]				●
Other Source Types (Catch Pans, Combustion Units, Equipment Leaks, Loading Ops, Line/Vessel Openings, Sumps/OWSs, Vacuum Trucks)				●
Control Devices	●	●	●	●

Custom Reports[2]		●	●	●
Stores source data	●	●	●	●
Stores service data	●	●	●	●
Stores stock data	●	●	●	●
Stores pure chemical data	●	●	●	●
Multi-User Discount		●	●	●
Includes Tech Support		●	●	●

1 Tabular data entry: The ESP+ TankESP LT subscription has the same graphical user interface (GUI) as the other versions, but only one row of service data can be entered for the selected time period for each tank on the Service Info (Tanks) table.

2 Custom reports: The ESP+ TankESP LT subscription has a canned report similar to the detailed report from EPA TANKS 4.09d, with no functionality for the user to create other reports. All four ESP+ modules allow printing reports to Microsoft Excel.

Add-On Tool

Sitewide Rolling Emission Report		●	●	●

This optional tool, available for purchase separately, automatically combines emissions from all tank and non-tank sources at a site and calculates the monthly rolling sum, including speciation.

Without this add-on, users managing multiple tank and non-tank sources must manually merge emissions data and calculate the rolling sum - a process that can be both tedious and time-consuming. By adding the Sitewide Rolling Emission Report to an existing subscription, users can streamline their workflow and focus on higher-priority tasks while BREEZE ESP+ handles the heavy lifting.
