

Construction Environmental Management

Trinity Consultants is a leading global environmental consulting firm that brings 50 years of experience providing services and solutions in the EHS Regulatory Compliance, Water & Ecology, Built Environment, and Life Sciences markets. Trinity has the technical expertise, industry depth, and specialized capabilities to help clients achieve their goals across the natural and built environments.

Minnow and Ecofish, both Trinity Consultants companies, are recognized leaders in environmental assessment and monitoring, offering key services to industry, government and First Nations. With extensive experience gained from hundreds of successful project assignments, and a unique perspective gained by writing environmental guidelines on behalf of government, we offer proven problem-solving expertise to the mining, energy, forestry, LNG, linear development, and ecological restoration sectors.

Environmental management and monitoring for construction projects is a key aspect of our practice. As part of our responsibilities for major EA certified projects, we have extensive environmental compliance monitoring experience in roles as Owners Representative, Contractors QP, and Independent Environmental Monitor and Auditors. We have developed numerous construction ready plans (e.g., Construction Environmental Management Plans (EMPs), Environmental Protection Plans (EPPs), Construction Mitigation Plans, Erosion and Sediment Control Plans (ESCP), and Best Management Practices (BMPs)) for our clients in the mining sector. We also provide and implement Environmental Management Systems (EMS) to help assure compliance of construction projects with regulatory guidance and permits. We understand the components, challenges, and constraints of construction projects, and can confidently provide the diligence and assurance required to see these through to successful completion.
