

Soils and Reclamation

Trinity Consultants is a leading global environmental consulting firm that brings 50 years of experience providing services and solutions in the EHS Regulatory Compliance, Water & Ecology, Built Environment, and Life Sciences markets. Trinity has the technical expertise, industry depth, and specialized capabilities to help clients achieve their goals across the natural and built environments.

Minnow and Ecofish, both Trinity Consultants companies, are recognized leaders in environmental assessment and monitoring, offering key services to industry, government and First Nations. With extensive experience gained from hundreds of successful project assignments, and a unique perspective gained by writing environmental guidelines on behalf of government, we offer proven problem-solving expertise to the mining, energy, forestry, LNG, linear development, and ecological restoration sectors.

Our Environmental Services team provides a comprehensive set of services to help clients navigate the regulatory processes associated with soil inventory, soil health, and reclamation. We have extensive experience in the application of avoidance, mitigation, and soil conservation measures to support our clients in protecting terrestrial ecosystems and comply with regulatory and policy requirements.

We have established a solid reputation in the industry by providing innovative, cost-effective, and successful support for projects that necessitate environmental considerations. Our reclamation & conservation efforts are driven by regulatory requirements and public stakeholder commitments outlined in the *Environmental Assessment Act*, the *Mines Act*, and the *Environmental Management Act*. Our team of experienced professionals have effectively assisted numerous clients in characterizing the quality and quantity of soil and terrain resources loss or alteration. In addition, we actively engage with First Nations and other project stakeholders, ensuring a collaborative approach. Our expertise extends to the development of scientifically defensible reclamation and closure plans, as well as the implementation and monitoring of conservation and reclamation measures.
